Docket No. 3634-025

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Smith et al.

Filed: December 7, 2001

Group Art Unit: 1647

Serial No: 10/008,960

Examiner: to be determined

For: SENESCENT CELL DERIVED INHIBITORS OF DNA SYNTHESIS

INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
Washington, D.C. 20231

Sir:

In order to comply with 37 CFR 1.97 and 1.98, attached hereto is a copy of Form PTO-1449 and copies of the documents listed thereon.

Applicants respectfully request the Examiner's consideration of the cited references and entry into the record of this application and that they be cited of record in the prosecution history of the present application by initialing Form PTO-1449 next to the document. Such initialing is requested even if the Examiner does not consider a cited document to be sufficiently pertinent to use in a rejection, or otherwise does not consider it to be prior art for any reason, or even if the Examiner does not believe that there has been full compliance with the guidelines for citation. This is requested so that each document becomes listed on the face of the patent issuing on the present application.

The present Information Disclosure Statement is being submitted in compliance with 37 CFR 1.56, but the citation of such document is not to be construed as an admission that such document is necessarily relevant or prior art. No representation is intended that the cited documents represent the results of a complete search, and it is anticipated that the Examiner, in the normal course of examination, will make an independent search and will determine the best prior art consistent with 37 CFR 1.104 and in the course of each search, will review for relevance every document cited on the attached form even if not initialed.
